

Part I

Writing

(30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence "There is a growing awareness of the importance of digital literacy and skills in today's world." You can make comments, cite examples or use your personal experiences to develop your essay. You should write at least 150 words but no more than 200 words.

You should copy the sentences given in quotes at the beginning of your essay.

Part II

Listening Comprehension

(30 minutes)

Section A

Directions: In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the center.

Questions 1 to 4 are based on the conversation you have just heard.

1. A) Reply to the man's last proposal within a short time.
B) Sign the agreement if one small change is made to it.
C) Make a sponsorship deal for her clients at the meeting.
D) Give the men some good news regarding the contract.
2. A) They are becoming impatient.
B) They are afraid time is running out.
C) They are used to making alterations.
D) They are concerned about the details.
3. A) To prevent geographical discrimination.
B) To tap the food and beverage market.
C) To avoid any conflict of interest.
D) To reduce unfair competition.
4. A) It is a potential market for food and beverage.
B) It is very auspicious for real estate development.
C) It is a metaphoric conduct for his occupancy.
D) It is very different from other markets.

Questions 5 to 8 are based on the conversation you have just heard.

5. A) They are thrilled by a rare astrometric phenomenon.
B) They are celebrating a big event on mountain tops.
C) They are enthusiastic about big science-related stories.
D) They are joined by astronomers all across North America.
6. A) It will be the most formidable of its kind in over a century.
B) It will come closer to Earth in more than one hundred years.
C) It will eclipse many other such events in human history.
D) It will be seen most clearly from Denver's mountain tops.
7. A) A blur.
B) Stars.
C) The edge of our galaxy.
D) An ordinary flying object.
8. A) Use professional equipment.
B) Climb to the nearby heights.
C) Fix their eyes due north.
D) Make use of phone apps.

听力分/总分: 听力答案
写作答案: 一、套卷

Directions: In this section, you will hear four passages. At the end of each passage, you will hear three or four questions about the passage and the questions may be asked only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the circle.

Questions 9 to 11 are based on the passage you have just heard.

9. A) The consumer should be warned against the government food.
B) The government is reluctant to establish voluntary guidelines.
C) The government can turn the bank for food production to consumers.
D) The government will agree to the consumer's self-produced food.
10. A) By the nature of chemical alteration.
B) By the concept of biological processing.
C) By the nature of chemical alteration.
D) By the concept of classification.
11. A) People's misunderstanding of nutrition.
B) Complexity of chemical changes.
C) People's misunderstanding of nutrition.
D) Children's dislike for unprocessed food.

Questions 12 to 14 are based on the passage you have just heard.

12. A) They begin to think of the benefits of exercising.
B) They try to quit smoking that makes people ill.
C) They try to quit smoking that makes people ill.
D) They begin to see the world in a different way.
13. A) It is a characteristic of all creative people.
B) It is a characteristic of creative people.
C) It is a creative person's response to limitation.
D) It is an attempt to socio-economic development.
14. A) It is a way of thinking of someone but this helps people's creativity.
B) It is a way of thinking of someone but this helps people's creativity.
C) It is a way of thinking of someone but this helps people's creativity.
D) It is a way of thinking of someone but this helps people's creativity.
15. A) It is a way of thinking of someone but this helps people's creativity.
B) It is a way of thinking of someone but this helps people's creativity.
C) It is a way of thinking of someone but this helps people's creativity.
D) It is a way of thinking of someone but this helps people's creativity.

Section C

Directions: In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the circle.

Questions 15 to 17 are based on the recording you have just heard.

16. A) Because they are honest.
B) Because they are honest.
C) Because they are honest.
D) Because they are honest.
17. A) The subject of difference is not similar to business on two sides.
B) The subject of difference is not similar to business on two sides.
C) The subject of difference is not similar to business on two sides.
D) The subject of difference is not similar to business on two sides.
18. A) The shark.
B) The shark.
C) The shark.
D) The shark.

Questions 19 to 21 are based on the recording you have just heard.

19. A) Help save species from extinction and boost human health.
B) Understand how plants and animals perished over the past.
C) Help gather information publicly available to researchers.
D) Find out the cause of extinction of Britain's 66,000 species.
20. A) It was once dismissed by dinosaurs.
B) It has caused the sixth mass extinction.
C) Its prospects depend on future human behaviour.
D) Its climate change is approved by humans.
21. A) It dwarfs all other efforts to conserve, protect and restore biodiversity on earth.
B) It is costly to get started and requires the joint efforts of thousands of scientists.
C) It can help to bring back the large numbers of plants and animals that have gone extinct.
D) It is the most exciting, most relevant, most timely and most internationally inspirational.

Questions 22 to 25 are based on the recording you have just heard.

22. A) Cultural identity.
B) Social evolution.
C) The Copernican revolution.
D) Human individuality.
23. A) It is a decision to be disposed of.
B) It is prevalent even among academics.
C) It is a myth spread by John Donne's poem.
D) It is rooted in the conflict of the 17th century.
24. A) He believes in Copernican philosophical doctrines about the universe.
B) He has gained ample scientific evidence at the University of Reading.
C) He has found that our inner self and material self are interconnected.
D) He contends most of our body cells can only live a few days or weeks.
25. A) By coming to see how disruptive such problems have got to be.
B) By realizing that we all can do our own bit in such endeavours.
C) By becoming aware that we are part of a bigger world.
D) By making joint efforts resolutely and persistently.

Part III Reading Comprehension (40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each blank on Answer Sheet 2 with a single line through the centre. You may use any of the words in the bank more than once.

It's quite remarkable how different genres of music can spark unique feelings, emotions, and memories. Studies have shown that music can reduce stress and anxiety before surgeries and we are all attracted toward our own unique life soundtrack.

If you're looking to 26 stress, you might want to give classical music a try.

The sounds of classical music produce a calming effect letting 27 pleasure-inducing dopamine (多巴胺) in the brain that helps control attention, learning and emotional responses. It can also turn down the body's stress response, resulting in an overall happier mood. It turns out a pleasant mood can lead to 28 a person's thinking.

Although there are many great 29 of classical music like Bach, Beethoven and Handel, none of these artists' music seems to have the same health effects as Mozart's does. According to researchers, listening to

it. Father time comes for us all eventually, even our often long lived, tall and leafy fellow cactaceans (仙人掌) of Earth. Finally, on October 9, 1942, the over 30 meter tall and 200-400 year old tree fell, rather like it, as a result of a severe windstorm and ice having previously died and its roots rotted.

E) About four years later, members of the Honor Ladies Garden Club (who'd tended to the tree before its unfortunate death) tracked down a small tree grown from a son taken from the original tree. And so it was that on October 9, 1946, under the direction of Professor Roy Bowden of the College of Agriculture at the University of Georgia, this little tree was transplanted to the location of its ancestor. A couple of months later, an official ceremony was held featuring none other than the Mayor of Athens, Robert L. McWhorter, to commemorate the occasion.

F) This new tree became known as The Son of the Tree That Owns Itself and it was assumed that, as the original tree's best, it naturally inherited the land it stood on. Of course, there are many dozens of other trees known to exist descending from the original, so people taking a cut from it to grow elsewhere was a certainty. That said, to date, none of the original tree's other children have petitioned the courts for their share of the land, so it seems all good. In any event, The Son of the Tree That Owns Itself still stands today, though often referred to simply as The Tree That Owns Itself.

G) This all brings us around to whether Jackson ever actually gave legal ownership of the tree to itself in the first place and whether such a deed is legally binding.

H) Well, to begin with, it turns out Jackson only spent about three years of his life in Athens, starting at the age of 43 from 1829 to 1832, sort of dismissing the idea that he loved the tree from growing from under it as a child and watching it grow, and then worrying about what would happen to it after he died. Further, an extensive search of land ownership records in Athens does not seem to indicate Jackson ever owned the land the tree sits on.

I) He did live on a lot of land directly next to it for those three years, but whether he owned that land or not isn't clear. Whatever the case, in 1832 a four acre parcel, which included the land the tree was on and the neighboring land Jackson lived on, among others, was sold to University professor Nathan A. Ward. In the transaction, Ward was required to pay Jackson a sum of \$1,200 (about \$31,000 today), either for the property itself or simply as compensation for improvements Jackson had made on the lot. In the end, whether he ever owned the neighboring lot or was simply allowed to use it while he allegedly worked at the University, he definitely never owned the lot the tree grew on, which is the most important bit for the topic at hand.

J) After Professor Ward purchased the land, Jackson and his family purchased a 605 acre parcel a few miles away and moved there. Two years later, in 1844, Jackson seemed to have come some financial difficulties and had his little plantation seized by the Clarke County Sheriff's office and auctioned off to settle the mortgage. Thus, had he owned some land in Athens itself, including the land the tree sat on, presumably he would have sold it to raise funds or otherwise had it taken as well.

K) And whatever the case there, Jackson would have known property taxes needed to be paid on the dotted land for the tree to be truly secure in its future. Yet no account or record indicates any such or the like was set up to illustrate this.

L) On top of all this, there is no hard evidence such a deed ever existed. Despite the fact that deed records in Athens go back many decades before Jackson's death in 1876 and that a man supposed to have existed in 1890 in the archives according to the original anonymous news reporter who claims to have seen it.

M) As you might imagine from all of this, few give credit to this side of the story. So how did all of this come about then?

N) It is speculated to have been invented by the imagination of the said anonymous author as the *Athens Weekly* reporter in the aforementioned 1890 front page article titled "Dedicated to Itself", which by the way contained

and the fact that the speech was actually given to be false. As to why the author would do this, it's
suggested that it might have been a 19th century woman who thought extreme on whether it would be legal
for a woman to stand with some important things that they might not.

- Q7. The text says, the well-known instance all of them. The One itself being mentioned wasn't until 1911.
The text mentions a lot of the same things, the same. What's better. The featured another account very
different, showing the original article published about a decade before, only slightly rewritten. The new
version was in 1911, again in the 19th century. The original, again very clearly copying the original account,
was in the 19th century. The 19th century copy of the original suggests when the audience has forgotten about the

36. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
37. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
38. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
39. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
40. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
41. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
42. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
43. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
44. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
45. The text says that the author has mentioned the original of the oak tree so well in order to protect it from being

There are 2 passages in this section. The passage is followed by some questions or statements
which are followed by four choices marked A, B, C and D. You should decide on the best
choice for each of the questions or statements. There are 2 with a single line through the center.

Passage 1
Questions 1-5 are based on the following passage.

The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
The text says that the author has mentioned the original of the oak tree so well in order to protect it from being

The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
The text says that the author has mentioned the original of the oak tree so well in order to protect it from being

The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
The text says that the author has mentioned the original of the oak tree so well in order to protect it from being

The text says that the author has mentioned the original of the oak tree so well in order to protect it from being
The text says that the author has mentioned the original of the oak tree so well in order to protect it from being

When a group of employees sees unsafe behavior not being addressed at a leadership level it creates the perception that this is how those situations should be addressed, thus defining the safety culture for everyone.

Despite the fact that workers are encouraged to intervene when they observe unsafe operations, this happens less than half of the time. Fear is the ultimate factor in not intervening. There is a fear of penalty, a fear that they'll have to do more work if they intervene. Unsuccessful attempts in the past are another strong contributing factor to why people don't intervene—they tend to prefer to defer that action to someone else for all future situations.

On many work sites, competent workers must be empowered. Part of their job is to intervene when workers perform a task without the proper equipment or if the conditions are unsafe. Competent workers are also required to stop work when continuing when there's a danger.

Supervisors also play a critical role. Even if a competent person isn't required, supervisors need a broad set of skills to not only identify and alleviate workplace hazards but also instill a safety climate within their team that supports intervening and open communication among them.

Beyond competent workers and supervisors, it's important to educate everyone within the organization that they are obligated to intervene if they witness a possible unsafe act, whether you're a designated competent person, a supervisor or a frontline worker.

46. What is one of the factors contributing to failures of interventions in face of risky behavior at the workplace?

- A) Slack supervision style.
- C) Unfathomable risk.
- B) Unfavorable workplace culture.
- D) Blocked communication.

47. What does the author mean by "diffusion of responsibility" (Line 4, Para. 3)?

- A) The more people are around, the more they need to worry about their personal safety.
- B) The more people who witness an event, the less likely anyone will venture to participate.
- C) The more people killing around on the street, the more likely they need taking care of.
- D) The more people are around, the less chance someone will step forward to intervene.

48. What happens when unsafe behavior at the workplace is not addressed by the leaders?

- A) No one will intervene when they see similar behaviors.
- B) Everyone will see it as the easiest way to deal with crisis.
- C) Workers have to take extra caution executing their duties.
- D) Workers are left to take care of the emergency themselves.

49. What is the ultimate reason workers won't act when they see unsafe operations?

- A) Preference of deferring the action to others.
- C) Fear of being isolated by coworkers.
- B) Assumption of leadership intervention.
- D) Fear of having to do more work.

50. What is critical to ensuring workplace safety?

- A) Workers be trained to operate their equipment properly.
- B) Workers exhibiting at-risk behavior be strictly disciplined.
- C) Supervisors create a safety environment for timely intervention.
- D) Supervisors conduct effective communication with frontline workers.

Passage Two

Questions 51 to 55 are based on the following passage.

The term "environmentalist" can mean different things. It used to refer to people trying to protect wildlife and natural ecosystems. In the 21st century, the term has evolved to capture the need to combat human-made climate change.

...in the case of a split within the scientific community, it's worth the risk and the expensive solution in the short term. But reasonable are crucial, but any society needs to be able to make decisions when the sun isn't shining and the wind isn't blowing. Gas and coal, is a backup option, especially where there's no alternative. The Intergovernmental Panel on Climate Change, isn't a viable option to have if we're serious about reaching

...think we can actually meet climate goals with 100% renewable energy. And you care about the climate, you are forced to think

...to similarly contentious. Cities such as Burlington, Vermont, for example, have small populations, occasionally have significant wind resources at their immediate disposal. Meanwhile, some countries have extraordinary hydroelectric capabilities. Germany, for example, is pushing into green energy. The U.S. has an energy situation that would phase out nuclear power. The world's energy generation has increased over 40% since 2010.

...with the availability of renewables doesn't just mean energy is often available during the day, forcing utilities to struggle to transport the overabundance of energy. Many factories still run on coal and gas. The construction of new wind turbines

...about nuclear energy?

...agreement?

...Calling for nuclear energy when necessary

...Limiting people's non-basic consumption

...Burlington as an example?

...world's exclusive dependence on renewables is sustainable

...have renewable resources at their immediate

- C) It is arguable whether cities that manage to run off renewable have sustainable hydroelectric capabilities.
 D) It is debatable whether traditional fossil fuel energy can be done away with easily throughout the world.
54. What do we learn about Germany regarding renewable energy?
- A) It has increased its wind and solar power generation four times over the last two decades.
 B) It represents a good example of a major industrialized country promoting green energy.
 C) It relies on renewable energy to generate more than half of its electricity.
 D) It has succeeded in reaching the goal of energy transition set by Merkel.
55. What may be one of the reasons for Germany's program having failed in recent years?
- A) Its grid infrastructure's capacity has fallen behind its development of green energy.
 B) Its overabundance of green energy has forced power plants to suspend operation during daytime.
 C) Its industrial growth is tied to existing factories on conventional energy supplies.
 D) Its renewable energy supplies are unstable both at night and during the day.

Part IV

Translation

(30 minutes)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on Answer Sheet 2.

中国的传统婚礼习俗历史悠久，从周朝开始就逐渐形成了一套完整的婚礼仪式，有些一直沿用至今。如今的中式婚礼习俗已有很大变化，但婚礼庆典仍十分隆重。婚礼轴轴通过精心筹备，以喜庆（jubilance）的红色为主色调，悬挂着许多祝福新人幸福的物件。在婚礼上，新人誓得天地（sworn to Heaven and Earth），得父母和相互对拜，然后敬高相侍酒席，并向宾客敬献喜酒。今天，许多年轻人仍保持传统，将波的中式婚礼，体验独特而美好的中国式婚礼。

Part I

Writing

(30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence "Nowadays more and more college students have come to regard social practice and academic learning as equally important." You can make comments, cite examples or link your personal experiences to the topic you choose. You should write at least 120 words but no more than 180 words.

You should write the answer on the basis of the following information.

Part II

Listening Comprehension

(30 minutes)

Section A

Directions: In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the information and the questions will be spoken only once. After each question, you must choose the best answer from the four choices marked A, B, C and D. Then mark the corresponding letter on Answer Sheet 2 with a single line through the center.

Questions 1 to 4 are based on the conversation you have just heard.

1. A) Read newspaper-stations were put out of business.
B) Started all his newspaper using a machine.
C) Searched for the most-of-the-art models of printing.
D) Did thorough research on the price of kitchen appliances.
2. A) Buying a kitchen food.
B) Making a kitchen layout.
C) Using machines to do his cooking.
D) Making soups and juices for himself.
3. A) Cooking every meal carefully in his kitchen.
B) Buying the machine to his personal hygiene.
C) Eating breakfast partially every morning.
D) Making his own food from juice regularly.
4. A) The death of it is tragic.
B) It is the healthy and attractive.
C) One's fancy may be misled by it.
D) It is often an awareness of suffering.

Questions 5 to 8 are based on the conversation you have just heard.

5. A) It has been made more popular in the center of London.
B) Since the residents will keep London into a tourist attraction.
C) It is showing to himself consider the village of London to be.
D) He has let the people of London to change the village into city.
6. A) It was developed only to a limited extent.
B) It was badly injured to a sleepy village.
C) It was relatively unknown to the outside.
D) It was endowed with rich natural resources.
7. A) The people in London were in a luxurious atmosphere.
B) The majority of residents lived in harmony with their neighbors.
C) The majority of residents enjoyed easy living conditions.
D) All the citizens in London looked economically stable.
8. A) They have helped boost the local economy.
B) They have made the residents immensely proud.

- C) They have contributed considerably to its popularity.
 D) They have brought happiness to everyone in the village.

Section II

Directions: In this section, you will hear two passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the centre.

Questions 9 to 11 are based on the passage you have just heard.

9. A) They have created the smallest remote-controlled walking robot in the world.
 B) They are going to publish their research findings in the journal *Science Robotics*.
 C) They are the first to build a robot that can bend, crawl, walk, turn and even jump.
 D) They are engaged in research on a remote-controlled robot which uses special power.
10. A) It changes its shape by complex hardware.
 B) It is operated by a special type of tiny camera.
 C) It moves from one place to another by suction.
 D) It is powered by the elastic property of its body.
11. A) It replaces humans in exploratory tasks.
 B) Performs tasks in tightly confined spaces.
 C) Explores the structure of clogged arteries.
 D) Assists surgeons in highly complex surgery.

Questions 12 to 15 are based on the passage you have just heard.

12. A) She threw up in the bathroom.
 B) She slept during the roller ride.
 C) She closed off for a few minutes.
 D) She lost control of her marionette race.
13. A) They are mostly immune to cognitive impairment.
 B) They can sleep soundly during a rough ride at sea.
 C) They are genetically determined to need less sleep.
 D) They constitute about 13 percent of the population.
14. A) Whether there is a way to reach elite status.
 B) Whether it is possible to modify one's genes.
 C) Whether having a baby impacts one's parents.
 D) Whether one can train themselves to sleep less.
15. A) It is in fact quite possible to structure a passion for sleep.
 B) Babies can severely disrupt their parents' sleep patterns.
 C) Being forced to rise early differs from being an early bird.
 D) New parents are forced to jump out of bed at the crack of dawn.

Section C

Directions: In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the centre.

Questions 16 to 18 are based on the recording you have just heard.

16. A) We have poor awareness of how many controversial issues are being debated.
 B) No one knows better than yourself what you are thinking about at the moment.
 C) No one can change your opinions more than those who speak in a convincing voice.
 D) We are likely to underestimate how much we can be swayed by a convincing article.

17. A) Their belief about physical punishment changed.
 B) Their anxiety about their wives' actions caused a certain belief.
 C) The memory of their initial belief came back to them.
 D) Their experience of physical punishment changed them.
18. A) Their curiosity kept them to do with modern technology.
 B) They didn't follow the changes of view on physical punishment.
 C) They were not open to changes in science or daily life but not.
 D) They are unlikely to alter people's position without more evidence.

Questions 19 to 21 are based on the recording you have just heard.

19. A) American women have been increasingly limited in their choice.
 B) The American population has been on the rise in the past 25 years.
 C) American motherhood has usually been on the decline.
 D) The daily work in America have in fact been going sharply.
20. A) They are anxious that to take good care of their children.
 B) They are anxious to unconsciously side to misbehaviour.
 C) A large proportion of women take pride in their children.
 D) A large proportion of women really enjoy motherhood.
21. A) The meaning of motherhood has changed significantly.
 B) Mothers and their mothers go shopping in town themselves.
 C) Their mothers keep their children celebrating the holiday.
 D) The number of American mothers has been growing steadily.

Questions 22 to 25 are based on the recording you have just heard.

22. A) Add to better water pollution.
 B) Always pollution abatement.
 C) Identify the best environmental
 D) Deal up surrounding structures.
23. A) NASA got experiments to make conditions resembling the super polluted offices of 1970s.
 B) It was based on experiments under conditions unlike those in most homes or offices.
 C) NASA simulated task in open space where workmanship is different from ours.
 D) NASA is conducted without any assumption that there were experiments.
24. A) NASA's ventilation system work more efficient for cleaning the air than is use plants.
 B) NASA glass display chemical components more quickly with people moving around.
 C) NASA's ventilation turn out to be more effective with doors and windows wide open.
 D) NASA plants in a compact environment carry from any adverse impact on the air.
25. A) The most cause for the overpopulation of scientific findings.
 B) The difficulty in understanding what's actually happening.
 C) The time to be taken in writing or say conclusion with accuracy.
 D) The quantity of occasionally re-examining and challenging findings.

Part III

Section A

Reading Comprehension

(40 minutes)

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before

making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on Answer Sheet 2 with a single line through the circle. You may not use any of the words in the bank more than once.

The Sun Is Also a Star is a truly lovely story of love, romance, fate, and destiny.

Natsuko is a Jamaican-born immigrant living 26 in America, not by choice exactly. Her parents brought her over and created the situation she 27 to be out of.

Daniel is an American born of Korean immigrants. He believes in that love, fate, and all that other nonsense that Natsuko 28 through scientific reasoning.

Daniel and Natsuko meet by 29 on the streets of New York on the day that she is to be 30. She doesn't tell him that but does allow him to keep her company while he tries to get her to fall in love with him over the course of the day.

Natsuko is me. I found her so similar to myself. She's scientifically-minded, practical, somewhat cynical, and always 31. Her chemistry with the universe through a scientific lens is infectious and I 32 Daniel seeing this too.

Daniel is charming and passionate and has a way with words that even 33 Natsuko's tough outer shell. By the end of the book I fell in love with both of them.

I used to find romance stories to always be cliché or laughable. I think now I can see the value in stepping into a story of pure optimism. I got 34 in *The Sun Is Also a Star* and finished it cover to cover in a weekend. I couldn't wait to get to what I hoped would be a happy ending.

It's nice every once in a while to give in to magic. It doesn't have to be a hard fantasy novel with actual spells. It can be the magic found between two people who just have that special something. That 35, then, causes them to react and speak when they're near each other.

Section II

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on Answer Sheet 2.

There are the habits as would if you want to make a behavior change

- A) According to recent research, behavioral change involves physical changes in the brain. In the past decade, researchers have shown that when it comes to the question of creating a new behavior, a deep-rooted habit there is not a simple matter. Even for the most productive and disciplined among us, making something that

- ...the power of habit of what we are doing shapes that an overnight effort. Once we've successfully formed a habit, we can then use that habit to our lives to ensure that we continue to maintain that habit. This is the challenge in habit formation.
- B) An important element of habit formation is that it rarely occurs without the introduction of some external cue. This cue can be a physical object, a place, or even a time of day. In this case, we face a greater likelihood of detailing our habit. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- C) The first step in forming a habit is to choose a specific behavior. This should be a behavior that you want to do, and it should be something that you can do consistently. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- D) The second step in forming a habit is to choose a specific cue. This should be a cue that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- E) The third step in forming a habit is to choose a specific reward. This should be a reward that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- F) The fourth step in forming a habit is to choose a specific trigger. This should be a trigger that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- G) The fifth step in forming a habit is to choose a specific habit. This should be a habit that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- H) The sixth step in forming a habit is to choose a specific habit. This should be a habit that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.
- I) The seventh step in forming a habit is to choose a specific habit. This should be a habit that you can associate with the behavior. For example, if you want to form a habit of exercising, you might choose to go to the gym at a certain time each day. By associating a behavior with a specific cue, we should pay away from that cue.

prepared meals on Sunday and stuck to eating healthy dinners at home, but by Friday you found yourself so exhausted you opted to order greasy takeout. Life happens and even if your behavior change is small, every single day can prove pretty tedious, and at some point your luck may run out, even if just for a day. The perfectionism in you might be screaming to abandon your goals altogether, but try to see it in the bigger picture. Just because you might have temporarily strayed off course doesn't mean you can't start afresh the next day.

- J) The final one to avoid is disappointing small progress. There's a habit that many perfectionists tend to fall into when they try to establish a behavior change. They focus too much on the big goal and don't take the time to celebrate the small progress they make in the process. Your brain responds to rewards. The basal ganglia, the brain region linked to our performance of habits, is most active at the beginning of a behavior, when the habit is new, and at the end, when it's rewarded. Say your goal is to run five miles three times a week, and this week you ran one mile on Monday, Wednesday, and Friday. Rather than focusing on how far you've gone toward your goal, think about how you can reward yourself for the progress you've made. It doesn't have to be big or expensive; it can be something as simple as making your favorite fruit juice after your run. Whatever your reward, it has to be more than just the activity itself to get you going.
- K) Initiating a new behavior usually seems like the hardest part of the process of change. However, people often fail to adequately prepare for maintaining it. One of the reasons for this is because we mistakenly believe the strategies we used to initiate the change will be equally effective in helping us overcome the change. But they won't. When changing a strongly deep-rooted habit requires changing our belief about that habit that permeates deeply into our lives, occasionally overruling that wisdom requires that we maintain a positive outlook. If our mood is low, the wisdom to behave differently seems to disappear and we go back to eating more and exercising less. The key, then, to maintaining new behaviors is to be happy! Which is why it's so hard to maintain new behaviors.
- L) Remember, overcoming the behavioral inertia that prevents us from implementing new changes, like eating a healthy diet or exercising, can benefit us in the long run and can improve our physical and mental health in one way or another with habits. They were all learned, and can all, therefore, be unlearned. The question is: how badly do you really want to change?
36. There is general consensus among experts that willpower alone cannot guarantee one's success in changing and maintaining a habit.
37. One need not abandon their goals completely just because they missed their target temporarily; they can start anew.
38. Research shows it is quite another challenge to maintain a behavioral change after you have initiated it.
39. It is wrong to assume the strategies we use to start a change of behavior will work equally well in helping maintain it.
40. Sometimes, it may not be successful to simply substitute one activity with another to effect a change of habit; you may need some reinforcement.
41. One should introduce something new to replace an old habit instead of simply kicking it.
42. Perfectionists focus too much on their big target and neglect celebrating the small goals they make in the process.
43. It is of great benefit to us in the long term to conquer the inertia that stops us from making behavioral changes.
44. The strategy that successfully changed one of your behaviors may just work for some other behavior of yours.
45. Without a happy mood, it seems that our wisdom to adopt a different behavior vanishes.

Directions: Read the passage in this section. Each passage is followed by some questions or unfinished statements. Choose the best answer from the four choices marked A, B, C and D. You should decide on the best choice before you start to write your answer. Mark your answer on ANSWER SHEET 2 with a single line through the circle.

Passage 1
Questions 41-45 are based on the following passage.
The "American Dream" promises that in this Land of Opportunity, any individual can climb the economic ladder and achieve a better life. In fact, hard work and sacrifice count. And yet, young Americans today are struggling to achieve the American dream that their parents did at the same age, and upward mobility in the U.S. actually compares unfavorably to that of other industrial nations.

In a new study of the American Dream published in a new study in the *American Journal of Political Science*, researchers find that the influence of reality TV

has been a major factor in the decline of US mobility over the past 20 years. Notes Frank Kim from Vanderbilt University, "The overwhelming majority of these have a 'rags-to-riches' storyline: they feature ordinary Americans who work hard to achieve great material success. And while these programmes are regularly among the most popular on television, which points to a more realistic view of the economic hardship faced by millions of Americans — not a much smaller percentage than you think."

Kim's study shows an interesting relationship between TV — but does a reality show programme actually encourage viewers to believe that success is easily possible? To find out, Kim's team had participants watch a 2-hour reality show with a rags-to-riches storyline. Control participants watched a clip from a reality show that had a different storyline. After watching the show, participants rated how much they agreed with the statement: "Working hard is the key to the American Dream."

The results showed that those who'd watched a rags-to-riches clip did indeed have a significantly greater belief in the American Dream. Interestingly, when participants were separated by party affiliation, the effect was stronger for Democrats than for Republicans, suggesting that the kind of messages implicit in these TV shows are more appealing to voters' economic beliefs.

The study conducted a survey of 1,000 US residents. They also rated the extent to which they believed success in life is related to various internal factors such as ambition and external factors such as family wealth. Results show that a list of TV programmes correlated with which they regularly watched.

Participants who were heavy viewers of rags-to-riches programmes in frequent viewers had a stronger belief in the American Dream than those who never watched such shows.

The researchers also suggest that entertainment media are an important cultural force that promotes and perpetuates beliefs about mobility. And here's the warning: if people mistakenly believe that hard work is all that's needed for success in life, it's better for them to believe that, they may be less susceptible to policies that could actually reduce inequality.

"The story of choice, commitment, struggle, and capture hearts and minds," Kim writes. "It's political messages are everywhere, but it's not."

41. What is the main idea of the passage about young Americans at today?
A. They have great ambitions like their parents.
B. They find it difficult to achieve upward mobility.
C. They believe success is just a matter of hard work.
D. They worry the opportunity is being taken away by others.

47. What does Xiao's study find about reality TV shows in America?
- A) They reinterpret the essence of the popular rags-to-riches culture.
 B) They urge people to achieve sustainable success through hard work.
 C) They help strengthen people's conviction in the American Dream.
 D) They feature ordinary Americans striving for social acceptance.
48. What does the author say about news broadcasts in America?
- A) They attract far fewer viewers than reality TV. C) They stand in striking contrast with reality TV.
 B) They are best on reporting the dark side of life. D) They focus on Americans' economic hardships.
49. What can we infer from the passage about Republicans in general?
- A) They believe strongly in the American Dream.
 B) They aspire to climb the socio-economic ladder.
 C) They have a very strong affiliation with their party.
 D) They tend to watch more rags-to-riches TV shows.
50. What is stated about people who believe in upward mobility?
- A) They are likely to blame the government for their plight.
 B) They regard political consequences as anything but trivial.
 C) They respect individuals striving to climb the social ladder.
 D) They are less likely to approve of policies to fight inequality.

Passage Two

Questions 31 to 35 are based on the following passage.

When someone asks us "what do you do?" we nearly always reply with our occupation. Work, for many of us, is much more than a job. It is the defining aspect of our identity. For many of us it is through our job that we can define ourselves.

"Without my job I don't know who I am," is a sentence that has been uttered on more than a handful of occasions from my office chair. Indeed, it can be one of the most challenging aspects I work on with clients who have lost or been forced into changing their jobs. This loss provides an identity crisis much greater than the loss of the job itself.

One of the things I have come to understand, however, is that our identity is much more complex than we recognize at first glance. If we take the time to reflect we might recognize that as well as our work we can also identify as a friend, a spouse, a son or daughter, a parent, a member of a sports team or religious community. We may recognize that we feel and act differently in those roles and relationships than we do at work. The person daughter becomes an assertive leader at work. Furthermore, our interests or work are not static. They change over time. I myself have been a shop assistant, a waitress, a student, a graduate, and a clinical psychologist. At each stage my ability to adapt to and develop my career identity has been crucial to my well-being. While we like to claim that uncertainty as our firm as much level we have to manage uncertainty, especially in today's volatile and ever-shifting job market.

How we see ourselves is central to the issue of our identity. When we tell ourselves "I'm good at starting projects but not so good at seeing them through" it can become part of our belief system. But if you have the unfortunate experience of an unwanted job change you will want to examine those beliefs to see how grounded in reality they are. You will be required to ask yourself how helpful those beliefs are and consider personal change. We can change our beliefs, behaviours and emotional experiences at any time through experimentation, practice and conscious self-discipline. In an age when career progression may lead us into new sectors it is ever more

大学英语六级考试 2024 年 6 月真题 (第三套)

Part I

Writing

(30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence "University, cultivating independent learning ability is becoming increasingly crucial for personal development." You can make comments, cite examples or use your personal experience to develop your essay. You should write at least 150 words but no more than 200 words.

You should copy the sentence given in quotes at the beginning of your essay.

Part II

Listening Comprehension

(30 minutes)

特别说明: 由于多题多考, 官方第三套真题听力试题与第一套真题的一致, 只是选项顺序不同, 因此, 本套就不再做听力部分。

Part III

Reading Comprehension

(40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on Answer Sheet 2 with a single line through the centre. You may not use any of the words in the bank more than once.

A rainbow is a multi-colored, arc-shaped phenomenon that can appear in the sky. The colors of a rainbow are produced by the reflection and 30 of light through water droplets (小滴) present in the atmosphere. An observer may 27 a rainbow to be located within reach or far away, but this phenomenon is not actually located at any specific spot. Instead, the appearance of a rainbow depends entirely upon the position of the observer in 28, in the direction of light. In essence, a rainbow is an 29 illusion.

Rainbows present a 30 made up of seven colors in a specific order. In fact, school children in many English-speaking countries are taught to remember the name "Roy G. Biv" as an aid for remembering the colors of a rainbow and their order "Roy G. Biv" 31 for: red, orange, yellow, green, blue, indigo, and violet. The outer edge of the rainbow arc is red, while the inner edge is violet.

A rainbow is formed when light (generally sunlight) passes through water droplets 32 in the atmosphere. The light waves change direction as they pass through the water droplets, resulting in two processes: reflection and refraction (折射). When light reflects off a water droplet, it simply 33 back in the opposite direction from where it 34. When light refracts, it takes a different direction. Some individuals refer to refracted light as "bent light waves." A rainbow is formed because white light enters the water droplet, where it bends in several different directions. When these bent light waves reach the other side of the water droplet, they reflect back out of the droplet instead of 35, passing through the water. Since the white light is separated inside of the water, the refracted light appears as separate colors to the human eye.

- A) because
- B) completely
- C) dispersion
- D) essence
- E) hanging
- F) optical
- G) separation
- H) perceive

- I) phenomena
- J) provider
- K) gradually
- L) richly
- M) return
- N) spectrum
- O) inside

excuses for the next meeting," says researcher Joseph Allen. "Then, add the compounding of back-to-back bad meetings and we may have an epidemic on our hands."

- H) In an effort to combat the side effects of MRS, Allen, along with researcher Joseph Mroz and colleagues at the University of Nebraska-Omaha, published a study detailing the best ways to avoid common traps, including a concise checklist of do's and don'ts applicable to any workplace. Drawing from around 200 papers to compile their comprehensive list, Mroz and his team have now held a remedy to the largely undefined problem of MRS.
- T) Mroz says a good place to start is asking ourselves if our meetings are even necessary in the first place. If all that's on the agenda is a quick catch-up, or some non-urgent information sharing, it may better suit the group to send around an email instead. "The second thing I would always recommend is keep the meeting as small as possible," says Mroz. "If they don't actually have some kind of immediate report, then they can follow up later. They don't need to be sitting in this hour-long meeting." Less time in meetings would ultimately lead to more employee engagement in the meetings they do attend, which experts agree is a proven remedy for MRS.
- J) Employees also feel taxed when they are invited together to meetings that don't require participation, says Cliff Seitz, professor of organizational science. He offers practical tips for them to vent their emotions, complain and try to regain focus after a pointless meeting—one of the main traps of MRS. Over time as employees find themselves tied up in more and more unnecessary meetings—not even dealing with increasing lag across from MRS—the waste of workday hours can feel insidious.
- K) Despite the relative scarcity of research behind the subject, Hartman has taught herself many of the same tricks suggested in Seitz's study, and has come a long way since her days of being stuck with unnecessary meetings. The people she invites to meetings today include not just the essential employees, but also representatives from every department that might have a stake in the issue at hand. Managers like her, who seek input even from non-experts to shape their decisions, can find greater support and cooperation from their workforce, she says.
- L) If an organization were to apply all 22 suggestions from Mroz and Allen's findings, the most noticeable difference would be a stark decrease in the total number of meetings on the schedule, Mroz says. Less time in meetings would ultimately lead to increased productivity, which is the ultimate objective of overcoming a meeting. While some of the counter-MRS ideas have been tested empirically yet, Allen says one trick with promise is for employees to identify things that quickly change their mood from negative to positive. As simple as it sounds, finding a personal happy place, going there and then coming straight back to work might be key to facilitating recovery.
- M) Leaders should see also themselves as "stewards of everyone else's valuable time", adds Sheryl Ringberg, author of *The Surprising Science of Meetings*. Having the skills to foresee potential traps and treat employees' schedules with care allows leaders to provide effective short-term solutions to MRS.
- N) More important, however, is for organizations to embrace the concept of meetings being flexible, says Allen. By rethinking the way they prioritize employees' time, companies can eliminate the very sources of MRS in their tracks.
- O) Although employees are said to be fatigued by meetings, the condition has not been considered worthy of further research until recently.
- P) Mroz and his team compiled a list of what to do and what not to do to remedy the problem of MRS.
- Q) Companies can get rid of the root cause of MRS if they give priority to workers' time.
- R) If workers are accustomed to a dangerous diagram, it is extremely hard for them to transition to the next work.
- S) Employees in America spend a lot of time attending meetings while the number of hours managers meet is several times more.
- T) Playful Hartman has learned by herself many of the ways Mroz suggested in his study and made remarkable progress in freeing herself from unnecessary meetings.
- U) When meetings continue too long or don't engage employees, they deplete vitality.

43. [redacted] engaged in the meetings they do participate in
44. [redacted] of the [redacted] parts of the working
45. [redacted] a very obvious change would be a steep decrease in

1. The first question is whether the proposed changes are necessary. The Commission believes that they are. The proposed changes are necessary to ensure that the Commission can effectively carry out its duties. The proposed changes are necessary to ensure that the Commission can effectively carry out its duties. The proposed changes are necessary to ensure that the Commission can effectively carry out its duties.

1990: You know them when you hear them. Sarcasm is

...with the, which is usually without any hostility and thus more system is easy while the talent.

...and the main reason for this is that the word "war" is often used in a very general sense, and it is often difficult to determine exactly what is meant by it. This is especially true when the word is used in a political or social context, where it can refer to a wide range of different activities and events. The purpose of this study is to explore the various meanings of the word "war" and to determine how it is used in different contexts. The study will focus on the use of the word in political and social contexts, and will examine the different ways in which it is used to describe different types of conflict. The study will also examine the different ways in which the word is used to describe different types of conflict, and will explore the different meanings of the word in different contexts. The study will also examine the different ways in which the word is used to describe different types of conflict, and will explore the different meanings of the word in different contexts.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE

[illegible]

Both men the opposite of a lot they appear in
 195 Both have hidden in them an eternal wisdom.

Q They feel a strong urge to retaliate

Q They feel an impulse of disguising their irritation

48. What happens when a person consistently acts sarcastically?
- A) They feel their dignity greatly heightened.
B) They feel increasingly insecure and hostile.
C) They capture hostility under the disguise of humor.
D) They use bitterness even to pleasant interactions.
49. What does the author say about people quitting sarcastic comments?
- A) It makes others happier and more self-confident.
B) It restrains them from being interfering and bullying.
C) It benefits not only themselves but also those around them.
D) It shields them from negative comments and outright hostility.
50. What is the chief difference between a speaker's wit and sarcasm?
- A) Their clarity.
B) Their appreciation.
C) Their emphasis.
D) Their intention.

Passage Two

Questions 51 to 55 are based on the following passage.

Variability is crucially important for learning new skills. Consider learning how to serve in tennis. Should you always practice serving from the exactly same location on the court, aiming at the same spot? Although practicing in more variable conditions will be slower at first, it will likely make you a better tennis player in the end. This is because variability leads to better generalization of what is learned.

This principle is found in many domains, including speech perception and learning categories. For instance, infants will struggle to learn the category "dog" if they are only exposed to Chihuahuas, instead of many different kinds of dogs.

"There are over ten different reasons for this basic principle," says Liora Raviv, the senior investigator of a recent study. "Learning from less variable input is often fast, but may fail to generalize to new stimuli."

To identify key patterns and understand the underlying principles of variability effects, Raviv and her colleagues reviewed over 150 studies on variability and generalization across fields, including computer science, linguistics, categorization, visual perception and formal education.

The researchers discovered that, across studies, the term variability can refer to at least four different kinds of variability, such as set size and scheduling. "These four kinds of variability have never been directly compared—which means that we currently don't know which is most effective for learning," says Raviv.

The impact of variability depends on whether it is relevant to the task or not. But according to the "Myriad principle", practicing seemingly unrelated skills may actually benefit learning of other skills.

But why does variability assist learning and generalization? One theory is that more variable input can highlight which aspects of a task are relevant and which are not.

Another theory is that greater variability leads to broader generalization. This is because variability will represent the real world better, including overlap (重叠) examples.

A third reason has to do with the way memory works: when training is variable, learners are forced to actively reconstruct their memories.

"Understanding the impact of variability is important for literally every aspect of our daily life. Beyond affecting the way we learn language, motor skills, and categories, it even has an impact on our social lives," explains Raviv. "For example, face recognition is affected by whether people grew up in a small community or in a larger community. Exposure to fewer faces during childhood is associated with diminished face memory."

"We hope this work will spark people's curiosity and generate more work on the topic," concludes Raviv. "Our paper raises a lot of open questions. Can we find similar effects of variability beyond the brain. For instance, in the business system?"

51. What does the passage say about infants' knowledge of category "dog" if they are exposed to 600 pictures only?
- A) They will recognize some degree of similarity.
B) They will try to recognize other objects that
C) They will prefer differences to other dog pictures.
D) They will ignore differences in various conditions.
52. What does the passage say about the three different kinds of variability?
- A) Words of dogs is more relevant to the task at hand than to be confirmed.
B) They have an impact on learning to the dogs being understood.
C) They have rather been directly compared to a category.
D) Words of dogs is more conducive to learning dogs to be identified.
53. How does one of the theories explain the importance of variability for learning new skills?
- A) Learning requires variable training as typical situations happens in the real world.
B) Learning involving variable training are complicated to recognize their meanings.
C) Learning pay attention to the relevant aspects of the task and ignore those irrelevant.
D) Learning focus on related skills instead of working time and effort on unrelated ones.
54. What does the passage say about face recognition?
- A) It is a growing up in a small community may find it easy to remember familiar faces.
B) Face recognition has a significant impact on nearly every aspect of our social lives.
C) Growing up in a large community and finally recognize any individual faces.
D) The size of the community people grew up in affects their face recognition ability.
55. What does the passage have to do with their research work?
- A) They studied various aspects of a task on relevance and which are not to learning a skill.
B) They investigated variability in teaching secondary related skills in education.
C) They studied the impact of variability and attention span research on the topic.
D) They studied the principle of variability in each field of study in the immune system.

Part IV

Translation

(30 minutes)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on Answer Sheet 2.

电子书画最早是由中国人发明，但在中国并不是很普遍。20世纪80年代，日本画家田中一光将日本传统书画与西方现代艺术相结合，创造出一种新的书画形式。这种形式不仅保留了传统书画的韵味，还融入了现代艺术的元素。田中一光的书画作品在国际上获得了广泛的认可和赞誉。他的创作灵感来源于日本的自然景观和传统文化，通过独特的构图和色彩运用，展现出一种全新的艺术风貌。这种书画形式不仅在日本国内受到欢迎，也在国际上产生了深远的影响。
